AMENDMENTS TO THE CLAIMS

The following listing of claims replaces all prior versions and listings of claims in the above-referenced application:

1 1.-13. (Canceled) A text enhancer, comprising: 1 14. (Currently amended) means for receiving a compiler output that includes data files and algorithms, 2 the compiler output in the form of a text file having a plurality of lines of information; 3 means for comparing the plurality of lines of information with a string to 4 generate a match; 5 means for compiling a statistic on the match; 6 means for converting the text file to a hypertext markup language translation 7 of the text file; 8 means for inserting an entry in the hypertext markup language translation of 9 the text file responsive to a condition of a device under test identified by the compiler; 10 11 and means for adding a summary to the hypertext markup language translation. 12 15. The text enhancer of claim 14, further comprising: (Original) 1 means for reporting the statistic. 2 16. (Original) The text enhancer of claim 14, further comprising: 1 means for applying a hypertext markup language link between the statistic and 2 an instance of the string in the match. 3 17. (Original) The text enhancer of claim 14, wherein the means for 1

comparing receives a previously stored string.

APPLICATION NO.: 10/054,155 ATTORNEY DOCKET NO.: 10011309-1

Page 3 of 10

- The text enhancer of claim 14, wherein the means for 18. (Original) 1 comparing receives a string via an input device. 2
- A program stored on a computer-readable 19. (Currently amended) 1 2 medium, comprising:
- logic configured to receive a compiler output that includes data files and 3 algorithms, the compiler output in the form of text data; 4
- logic configured to locate a text string within the text data; 5
- logic configured to log located text strings, wherein each occurrence of a 6 particular text string is associated with an indicator; 7
- logic configured to translate the text data to a hypertext markup language 8 format; 9
- logic configured to register a respective label and insert an entry in the 10 hypertext markup language format of the text data responsive to a condition of a 11 device under test in a text data summary identified by the compiler; 12
- logic configured to add the text data summary to the hypertext markup 13 language format; and 14
- logic configured to associate a particular label with occurrences of the 15 16 particular text string located within the text data.
- (Original) The program of claim 19, wherein the logic configured 20. 1 2 to log located text strings records a number of occurrences of the particular text string.
- The program of claim 19, wherein the logic configured 21. (Original) 1 2 to register a respective label concatenates the number of occurrences of the particular text string to the label to generate a summary entry. 3
- 1 22. (Previously presented) The program of claim 21, wherein the logic 2 configured to associate adds a link.

APPLICATION NO.: 10/054,155 ATTORNEY DOCKET NO.: 10011309-1

- The program of claim 22, wherein the link comprises 23. (Original) 1
- changing a characteristic of both the text string in the text data and the summary entry. 2
- The program of claim 22, wherein the link comprises 1 24. (Original)
- adding an alphanumeric character to both the text string and the summary entry. 2
- The program of claim 22, wherein the link is a hypertext 25. (Original) 1
- markup language link. 2
- 26.-41. (Canceled) 1
